GENERAL INFORMATION

Rule 1200-1-11-.04 requires that persons obtain a Hazardous Waste Transporter Permit if they transport hazardous wastes that originate or terminate at points in Tennessee. The permit will be issued by the Department upon review of a completed application renewal form, and receipt of any applicable fees. A copy of the permit must be maintained within each transport vehicle. Permits are registered to the EPA identification number supplied on the application renewal form. The EPA Identification number is specific to your location and the permit is therefore not transferable if you change locations. All permits issued for the first time require the payment of an application fee plus the permit fee shown in Rule 1200-1-11-.08. For annual renewal, the renewal forms and fee are due no later than December 31. The permit duration is from the effective date until January 31 of the following year. The regulations require transporters to comply not only with the permit regulations but also the operational standards of Rule 1200-1-11-.04 that pertain to manifests, other record keeping and hazardous waste discharges. You must also comply with any and all regulations imposed by the Tennessee Regulatory Commission, the U. S. Environmental Protection Agency, the U. S. Department of Transportation, U.S. Department of Homeland Security and any other pertinent local, state or federal laws.
